

## CD-08

Wireless PTZ control system for RS485-capable AHD, TVI, CVI and analogue cameras

### Compatible with the CAM8 family

With CD-04, you can control high-speed PTZ cameras and recorders within a range of 6 km. The CD-04 works with the latest HD-CVI, AHD and HD-TVI cameras, and with analog cameras supporting the RS485 or RS232 interface. Compatible with all PTZ CCTV camera protocols.

CD-08 is a next-generation miniature wireless system that enables control over the latest RS485-capable PTZ cameras. The system supports all CAMSAT wireless video systems. The transmission parameters are very much alike the widely popular CD04. CD-08 features a new processor for higher feed transmission speed.

<b>Operation frequency</b>	869.4–869.65 MHz
<b>Output power</b>	300 mW
<b>Operation range</b>	3 km
<b>Operating channels</b>	10
<b>Interfaces</b>	RS-485
<b>Baud rate</b>	1200, 2400, 6800, 9600, 19200 bps
<b>Format</b>	8n1, 8e1
<b>External use</b>	IP65
<b>Impedance</b>	50 Ω
<b>Miniature omnidirectional antenna</b>	360°
<b>Power supply</b>	10–15 V / 400 mA DC
<b>Operation temperature</b>	from –20°C to 55°C
<b>Dimensions</b>	58 × 83 × 38 mm
